REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claim 1 has been amended to include, *inter alia*, a parameter setting section that obtains a mode signal from a control section and determines whether to output a parameter for a fluorescence image or a parameter for a normal-light image to output a parameter suited to the mode, and a matrix section that applies prescribed matrix calculations to the red, green and blue signals subjected to the gain adjustment in the first white balance section using a parameter suited to the mode outputted by the parameter setting section to generate the fluorescence image signal or the normal-light image signal. The prior art of record, and specifically Kurashige et al. (US 2002/0063788), which was used to reject the previous claims, disclose certain spurious elements of the presently claimed combination (e.g., gain adjustment circuits, matrix circuits) but fails to structurally connect them with respect to a parameter setting section as now claimed. Therefore, claims 1-12 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Leubecker whose telephone number is (571) 272-4769. The examiner can normally be reached on Monday through Friday, 6:00 AM to 2:30 PM.
